HT=Hybrid Tea

Hybrid tea roses are the largest and most popular rose class, due to their elegant form and large variety of colours. They are known for their long, elegant, pointed buds that open slowly. They usually have only one flower per stem and tend to flower in three flushes from summer to late autumn

FL= Floribunda

Floribundas (also called cluster-flowered roses) have many flowers per stem and tend to repeat-flower continuously from summer to late autumn.

GR= Grandiflora

Grandiflora is a tall rose shrub derived from crosses of floribunda and hybrid tea roses and characterized by production of blooms both singly and in clusters on the same plant.
